Summary

BBA student at VIT Bhopal University with internship experience in content marketing and market research. Skilled in Excel, Power BI, communication, and business analysis, with a strong interest in analytics and marketing.

Education

VIT Bhopal University

2024 – 2027

Bachelor of Business Administration (BBA)

CGPA: 8.88

Experience

Webhood Infotech — Business Development Intern

1 July – 31 August 2026

- Sourced and targeted 50+ prospective businesses daily using Apollo.io and Google Maps to identify companies with no website or an outdated web presence.
- Conducted multi-channel outreach (calls, email, social) to pitch website development and maintenance services to business owners and decision-makers.
- Built a repeatable lead-sourcing and outreach process combining prospecting tools with direct pitching, supporting the agency's client acquisition efforts.

Projects

Retail Sales Analysis Dashboard

Excel — Power BI

GitHub Repository

- Analyzed a 51,000+ row retail sales dataset using Excel Pivot Tables.
- Developed an interactive Power BI dashboard with KPI cards, category-wise, regional, and sales trend visualizations.
- Identified top-performing product categories, regional sales distribution, and seasonal sales trends for business insights.

HR Analytics Dashboard

Excel — Power BI

GitHub Repository

- Analyzed 1,470 employee records using Excel Pivot Tables.
- Developed an interactive Power BI dashboard to track attrition by department, gender, salary band, age group, and job role.
- Identified salary-related attrition trends to support HR analytics and workforce decision-making.

AI Adoption & Business Performance Research

- Conducted a quantitative research study on the impact of AI adoption on business performance and employee productivity.
- Collected and analyzed survey responses from 50 participants using quantitative research methods.
- Analyzed findings on AI adoption, organizational efficiency, employee productivity, and business decision-making.
